

## **Take a look!**

We are Trimble Combustion Systems, a leading provider that designs, builds, installs, and services cutting-edge combustion equipment and technologies for specialized manufacturing processes located in Sunman, Indiana, and we like to do things a little differently. We believe our team should be like family. Not like a second cousin, twice removed, but more like the family you choose to be with every day. Our perseverance and passion to go above and beyond for our customers and team, high energy, and attention to even the smallest details are essential for safety and success of our customers and team. You must demonstrate our core values and keep safety as your #1 priority, that's key. We're also looking for unique enthusiasm, high integrity, courage to embrace change...and if you know a few jokes, that puts you on the top of our list.

Do you have a genius-level knowledge of process combustion equipment parts? If not, no problem! We're more interested in passionate people with strong mechanical and technical acumen and a willingness to learn. That's what keeps us at the top of our game.

If you're ready to roll up your sleeves, go above and beyond and put your ambition to work, all while having some fun, let's chat – Apply Today!

## **Perks**

- Quarterly profit sharing bonus
- All the traditional benefits like health and dental insurance, IRA/IRA match, and paid time off – don't worry, we've got you covered.

## **The Job at a Glance**

Our Field Service Engineer's (FSE) provide frontline service and support through their mechanical and technical expertise and troubleshooting. Our FSEs are the face of our company, in this customer-facing role you will design, build, install, service, and maintain combustion equipment and technologies at our customer sites, primarily in the manufacturing environment. Our FSEs use critical thinking to resolve issues within defined procedures and practices to determine appropriate action to rapidly repair equipment. Our FSEs operate within a team-based environment with opportunities to mentor and receive expert technical support. FSEs are required to travel within the continental United States to support our growing customer base.

## **A Typical Day**

- On-site service/field support including troubleshooting, burner air: fuel ratio tuning, safety evaluations all while delivering an exceptional customer experience (from your first service to your last!)
- Assembly and installation of burner management control panels and fuel trains.
- Effectively collaborate with customers, manufacturers, and internal departments regarding the customer's technical support needs
- Design/engineering of new systems or system upgrades which will improve safety, efficiency and product quality.
- Additional duties as assigned such as working in the shop and office as needed.

## **To Land This Opportunity**

- Bachelor's degree in engineering. (ME, MET, EE,) Associate's degree is acceptable.
- 3-5 years engineering experience desired.
- Industrial certifications and training a plus!
- Strong mechanical ability - knowledge of any mechanical machines and tools, including their designs, uses, repair, and maintenance; you may not be a master but you're on!
- Experience in CAD design software- electrical and mechanical drawings.
- Electrical knowledge - able to follow electrical schematics, basic electricity, power wiring.
- You exhibit stellar math, troubleshooting, organizational & general computer skills, with impeccable attention to detail.
- You're an All-Star communicator (written and verbal), with the ability to interact well with others (no zombies please!).
- You get excited about taking in-depth calls while maintaining a friendly and helpful demeanor.
- You have an outgoing, positive, team spirited, one-for-all personality.

## **About Your Future Team**

Our Team is filled with high energy, and humor. Bring your jokes, we are as passionate about laughing, as we are about providing superior customer experience.
